SUMMARY

Passionate full-stack developer leveraging a technical background in Neurobiology, Psychology, and clinical healthcare and patient advocacy, inspired by the need for greater ease of use and access to medical resources and patient-focused programs that encourage people to live happier and more health-minded lifestyles. Effective at combining creativity and problem solving to develop user-friendly applications bringing software lifecycles to fruition. Known amongst peers for strong wit, attention to detail, task monitoring, and communication, no matter the complexity of the project.

TECHNICAL SKILLS

LANGUAGES: JavaScript

Front-end Proficiencies: HTML, CSS, JavaScript, jQuery, Responsive design, media queries, flex box, React, Bootstrap

Back-end Proficiencies: APIs, Node, Express, MySQL, Sequelize, MongoDB, Mongoose, REST, GraphQL, Handlebars

PROJECTS

Weather-Or-Not | <https://github.com/njthanhtrang/weather-or-not> | <https://kingkevin05.github.io/weather-or-not/>

Activity recommender based on the searched city's location and current weather conditions. Integrates the Open Weather Map API with Eventbrite events in the area to provide indoor or outdoor activity suggestions.

Responsibilities: drop-down search menu, weather data and local time display, modals, API call to OpenWeatherMap.

Tools/Language: JavaScript, OpenWeatherMap API, EventBrite API, MD Bootstrap, GitHub Pages, server-side APIs, localStorage, modals

Family Financials | <https://github.com/njthanhtrang/famfin> | <https://familyfinancials.herokuapp.com/>

Investment teaching tool that allows family members to pool funds and purchase stocks together. Uses an MVC folder structure and express-session & cookies authentication, environment variables to store API keys and sensitive information.

Responsibilities: Sequelize configuration, user authentication, pie chart, user API routes, models, error handling messages

Tools/Language: JavaScript, Node.js, Express.js, Handlebars.js, MySQL, Sequelize, Heroku, UIKit

BrewMap 3.0 | <https://github.com/njthanhtrang/BrewMaps-3> | <https://brewmap3.herokuapp.com/>

Brewery locator and blog using OpenBreweryDB API and BingMaps. Users are able to sign up, sign in, search breweries in a specified city, favorite and unfavorite breweries to their profiles, and post and comment on the BrewMap blog.

Responsibilities: Favorites button and cart, adding and removing favorites to GraphQL, Link navigation, duplicate handling, user authentication, actions, queries, resolvers, mutations, Brewery model, typeDefs

Tools/Language: JavaScript, NoSQL, React single-page application, GraphQL API, Node.js, Express.js, MongoDB, Mongoose ODM, queries and mutations for retrieving, adding, updating, deleting data, concurrent servers in a MERN app, authentication, Heroku, JWT authentication, Bulma
